

Assembly Endgame - Screenshots

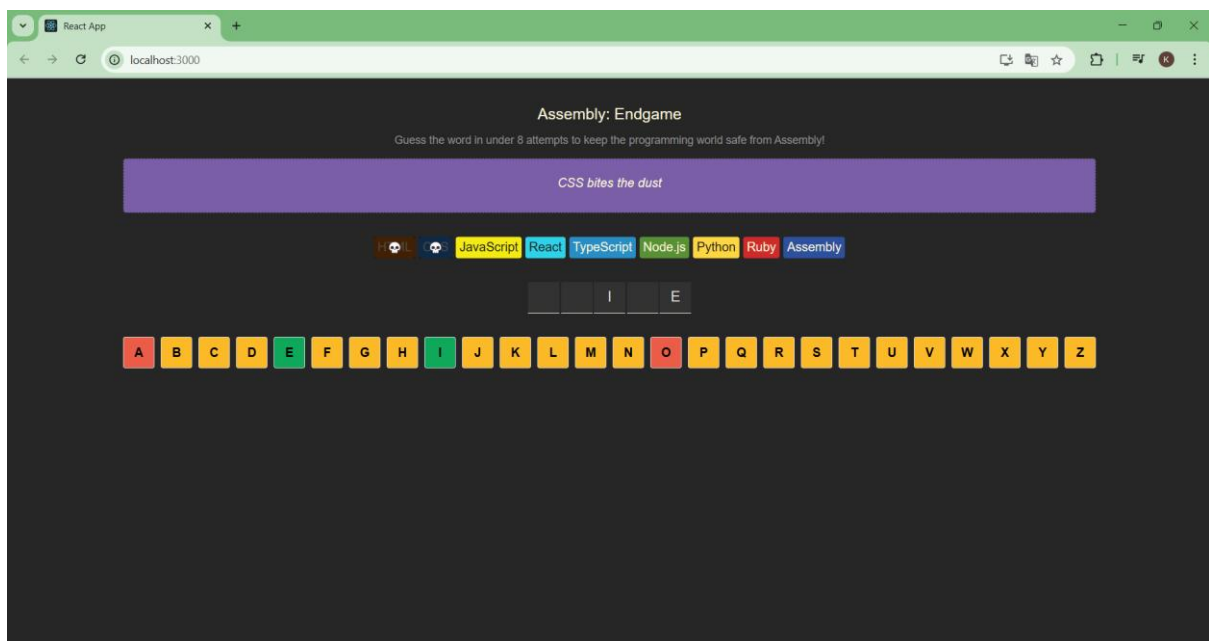

1. Game Start:

The initial screen of the game appears as shown below.

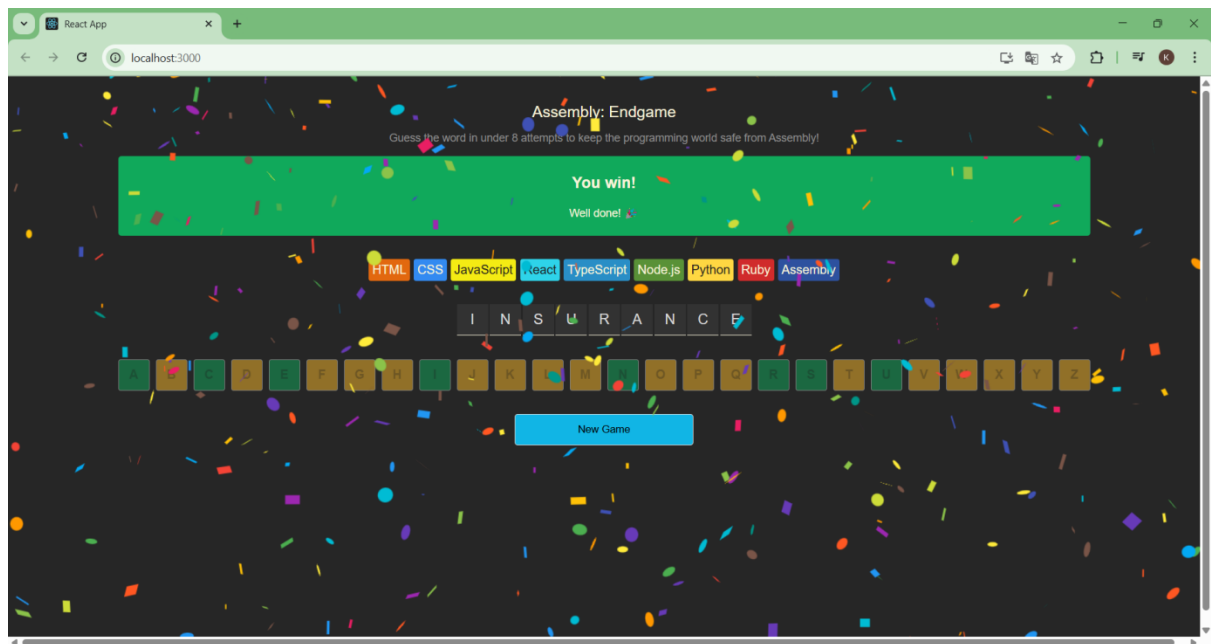

2. Incorrect Guess:

When incorrect letters are guessed, they turn red on the keyboard. The status message updates to indicate that a programming language has been destroyed, e.g., "CSS bites the dust". Correct guesses appear in green.

3. Victory Screen:

If the player wins, a celebratory screen with confetti is displayed.

4. Game Over:

If the player loses, the remaining correct letters are revealed in red. The game displays a “Game Over” message.
